

EFFICIENT

TACHOGRAPH

FUNCTIONS

TACHOGRAPH DATA MANAGEMENT

Legally compliant with the least possible work involved

The tachograph download takes place fully automatically with our efficient tachograph solution. This function considerably minimises the administrative work involved with reading the driver and vehicle data and the business card does not even have to leave the office.

Tachograph download

Manually reading digital tachograph driver (smart) cards and mass memories is no longer necessary. Now you can automate your tachograph download with our tachograph solution. The download takes place fully automatically in intervals of one day for the digital tachograph driver (smart) card and seven days for the mass memory. This function considerably minimises the administrative work involved with reading the driver and vehicle data and the business card does not even have to leave the office.

Tachograph archiving

Our tachograph archiving takes over the legally required archiving and backup of the data from the digital tachograph. All data is securely stored to a database. Access to the data is possible at all times. Thus, the requirements according to Regulation (EG) 561/2006 are fulfilled without any problems.

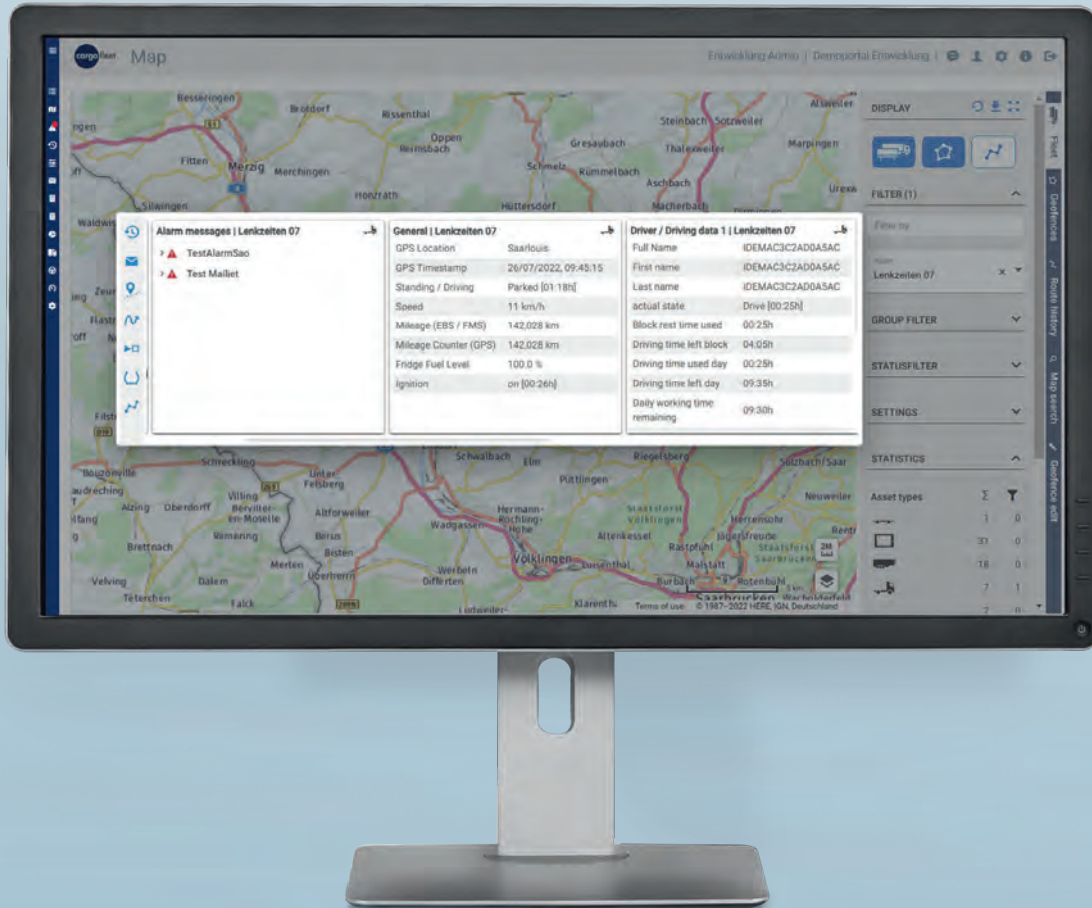

Driver status

How long has my driver been behind the wheel? Does he reach his destinations on time? Can he take on another job? We used coloured indications to give you a quick overview of the current driver status and which reserves are available for the vehicle or the driver in the day-to-day business. In addition to current driving and breaks for further planning, information on driver activities, speeds and offences is also available.

Infringement analysis

Avoid fines with our tachograph infringement analysis. All legal requirements with regard to monitoring compliance with all social regulations are met. Any infringements with regard to driving/rest times, working hours and speeds are checked and help to avoid expensive fines. The evaluations can be called up at any time via the portal in order to discuss them specifically with the drivers concerned.

Fully automated
and simple whilst
sitting at your desk!
